

PRODUCT BRIEF

# Evidence-backed VMware to Proxmox decisions.

Shift Evidence turns RVTools exports and guided senior context into a risk-qualified readiness pack for teams planning a VMware exit.

PROBLEM

## What it solves

Blind migration pressure, hidden storage constraints and unsupported VM edge cases before they become project blockers.

ENGINE

## How it works

Raw evidence is normalized, scored against target models and explained through a bounded advisor layer.

OUTPUT

## What buyers get

Executive summary, technical findings, risk matrix, storage suitability, missing evidence and staged planning guidance.

STARTER READINESS

**USD 490**

First evidence checkpoint

PROFESSIONAL ASSESSMENT

**USD 1,500**

Decision pack and risk matrix

MIGRATION BLUEPRINT

**From USD 3,500**

Waves, gates and rollback framing

MSP PARTNER

**From USD 799/month**

Reusable client-ready workflow

### Use this brief when:

- A stakeholder needs the short version.
- An MSP needs a pre-sales leave-behind.
